Occupational Certificate: Livestock Farm Supervisor NQF Level 3

Course Outcome

- + Monitor the health status of livestock and perform and direct health care treatments.
- + Attend to livestock production and breeding related activities.
- + Attend to supervisory and team leadership activities.

Course overview

the aim of this qualification is to address the needs of the commercial livestock farming industry as well as those of emerging farmers equally. The demand for a skilled workforce on livestock farms is recognized as a priority need by the livestock farming industry. A generic approach was followed with the design of the qualification to allow for mobility between a range of livestock farming industries such as cattle farming, mixed livestock farming, sheep farming, goat and mohair farming. Specific industry requirements, such as mohair farming, must be addressed through contextualization of learning resources. This qualification also provides a foundation in livestock farming practices that will allow persons to enter a formal career in the livestock farming sector. Sustainable food production and security is a national priority and includes livestock farming practices. This qualification supports this priority by providing a framework for skills development in livestock farming practices that will contribute to the achievement of sustainable red meat production.
